

Gabriel Juarez

IT Analyst · Software Engineering Student · Infrastructure & Dev

São Paulo, Brazil · github.com/gjrzz · LinkedIn · Bloomberg Terminal Technician Certified

SUMMARY

IT Analyst with 4+ years of hands-on experience in enterprise infrastructure, macOS/Windows endpoint management, and cloud identity — starting professionally at 16. Experienced in Microsoft Intune, Entra ID, Apple Business Manager, and Azure AD. Complements infrastructure work with software engineering skills: vibe-coding full-stack applications in TypeScript, React, and Python. Currently pursuing a Software Engineering degree at FIAP (3rd semester).

EXPERIENCE

IT Analyst

2023 – Present

Monte Bravo Corretora · São Paulo, Brazil

- Built and manage the full macOS enterprise stack: Apple Business Manager (ABM), Automated Device Enrollment (ADE), MDM Push Certificates, and Intune enrollment profiles from scratch.
- Configure and maintain Microsoft Intune and Entra ID (Azure AD) policies, including Platform SSO, compliance policies, LAPS concepts, and Settings Catalog for macOS/Windows.
- Troubleshoot complex MDM issues: Platform SSO privilege reversion loops, Company Portal deployment failures, AnyDesk PKG deployment errors (Intune 0x87D13B67), Teams SSO error 2602.
- Automate macOS dev environment provisioning via Homebrew shell scripts (Docker, Flutter, .NET, Node.js, Python, VS Code, Xcode, Android Studio).
- Deploy and manage Qualys Cloud Agent via Intune shell scripts across the device fleet.
- Deploy corporate wallpapers via shell script + mobileconfig, manage App Store app distribution through ABM/Intune VPP.
- Developed a full-stack internal Service Desk web app ('Central de Atendimento TI') using React 18 + TypeScript + Vite with ticket queues, SLA indicators, CSAT/NPS surveys, a Knowledge Base, and reporting dashboards.
- Manage Microsoft 365 licensing, Entra ID user lifecycle, domain federation concepts, and ABM billing/CNPJ compliance.

IT Analyst

2020 – 2023

Matiz Assessoria Contábil

- Entered IT professionally at age 16; managed on-premise infrastructure including local servers, NAS, and backup solutions.
- Provided end-user helpdesk support (Windows configuration, software deployment, peripherals).
- Automated workflows using Power Automate and Python scripts for routine IT tasks.
- Administered Windows Server environments and supported network setup and maintenance.

PROJECTS

Central de Atendimento TI — Monte Bravo

2024 – 2025

github.com/gjrzz/ServiceDeskMB · Personal / Work Project

- Vibe-coded a production Service Desk web application using React 18 + TypeScript + Vite, iterated with AI-assisted development tools (Kiro + Google AI Studio).
- Features: ticket queue management, SLA tracking indicators, CSAT/NPS surveys, a searchable Knowledge Base, and executive reporting views.

- Explored macOS 26 Liquid Glass UI effects and progressive web app design patterns for internal tooling.

Arduino Environmental Monitoring System

2025

Client: Vinheria Agnello · FIAP Academic Project · São Paulo, Brazil

- Built an IoT environmental monitoring system using Arduino and C++ (Wokwi simulator): LDR luminosity sensor with LED threshold indicators and a buzzer alert system.
- Designed for real-world deployment at a wine cellar client to track temperature, humidity, and light conditions.

TECHNICAL SKILLS

Languages	TypeScript · JavaScript · Python · HTML · CSS · C++ (Arduino) · Bash/Shell
Frontend	React 18 · Vite · Tailwind CSS · Figma (UI/UX Prototyping) · Design Systems
Cloud & MDM	Microsoft Intune · Microsoft Entra ID (Azure AD) · Apple Business Manager (ABM) · Microsoft 365
macOS Mgmt	ADE/DEP Enrollment · Platform SSO · Settings Catalog · mobileconfig · Qualys Agent
Windows	Windows Server · Active Directory · NAS/Backup · Power Automate · NVM · Helpdesk
DevOps/Tools	Docker · Git · GitHub · GitHub Actions · Node.js · npm · Homebrew
Other	Bloomberg Terminal Technician · OCLP (OpenCore Legacy Patcher) · Cybersecurity / Red Team (learning)

EDUCATION

Tech High School

2021 – 2024

Senac Lapa

B.Sc. Software Engineering

2025 – Present

FIAP — Faculdade de Informática e Administração Paulista

3rd semester · Focus: full-stack development, IoT, UI/UX, agile methodologies

CERTIFICATIONS & EXTRAS

- Bloomberg Terminal Technician — Bloomberg LP
- Microsoft Intune & Entra ID — Hands-on enterprise deployment experience
- Apple Business Manager — ABM/MDM integration, VPP, ADE enrollment lifecycle
- Languages: Portuguese (native) · English (professional)
